

INTERIOR

The Jenkins Group interior design services include programming, building analysis and selection, design development, contract documents, construction administration, and post occupancy evaluation. Our goal is to tailor our design to the needs of each unique client and provide a quality design solution that is aesthetically pleasing, technically sound and within budget all while fitting into the brand image of the client.

CLARIANT COLORWORKS LAB

***WINNER 2013 ALA INTERIOR MERIT AWARD**

Location: West Chicago, IL

Project Description: The Clariant Colorworks Lab is a renovation to an existing office space to create a multi-functional design center. The space serves as a research and design center for corporate clients where colored plastic is developed for a product in concept, then manufactured in a viewable production space and finally analyzed in a controlled lighting Lab. The modern design serves the function of being a “clean palette” space for designers while featuring splashes of bold color to fit Clariant’s branding image
