

OFFICE

The Jenkins Group has extensive experience working on office building projects. In office design we feel our philosophy enables us to tailor our services to match each client's unique needs and objectives by having each project closely managed by one of the firm's principals. Our goal is to exceed our client expectations by providing quality design solutions that are technically sound and within budget

ORIGINAL FACADE

STRACK & VAN TIL CORPORATE HEADQUARTERS

Location: Highland, IL

Project Description: The Strack and Van Til office renovation and addition to 63,727 SF office space presented a significant challenge to upgrade the façade while adding office space and HVAC to a limited existing structure while remaining functional as an office space. The façade provides a contemporary looking office building while blocking from view unsightly building equipment. The dramatic 2 story lobby space with an overlooking 2nd floor conference room provides a corporate brand image.
